

WHY BUY a Pyroclassic Fire?

- More than 30 years as New Zealand's cleanest, most efficient wood fire.
- The Pyroclassic IV is the only clean air approved fire to provide a 12 hour+ overnight burn*.
- Single air control with no damper for clean, hassle-free burning with no smoky start-up fires.
- A max heat output of 14.8kW (NZHHA tested).
- Rather than industry standard fire bricks, which are incapable of holding excess heat, the Pyroclassic fire chamber is one big heat store and retains heat like a kiln.
- The 10mm thick top plate is perfect for cooking. Boil the kettle, simmer a casserole and even bake bread with the optional cooktop oven.
- Get more from your firewood with a low fuel consumption of 1.1kg per hour.
- With a low 0.3g/kg emissions rating and a max efficiency rating of 83.3%, the Pyroclassic IV is a high performing appliance for the environmentally conscious.
- Pyroclassic is both a radiant and convection heater = more warm air in your home.
- North to south firebox orientation for along the grain efficient burning.
- 15 year warranty on the ceramic cylinder.
- With an extensive range of more than 100 colours, find a colour that perfectly complements your home.
- A FREE Essentials Kit is provided with every fire. This includes a digital moisture meter, custom rake and shovel set and twin pack of re-usable firelighters, valued at \$115.
- Suitable for homes from 100m² - 200m²+
- Fit your Pyroclassic fire with our high output 3.7kW wetback for a sustainable and affordable long term solution for water heating. Uniquely situated in the fire's upper chamber, the wetback utilises the hot gases that would otherwise be sucked up the flue.
- Every Pyroclassic fire is handmade in Hawke's Bay to ensure impeccable quality, 100% of the time.
